

Playgrass®

by Edel Grass

The best alternative to nature

Edel Grass Landscaping

Edel Grass has an extensive collection of artificial turf for landscaping. Our in-house research and development centre enables us to design, manufacture, test and continually refine our products. Our collection is suitable for the following applications:

- Playgrounds.
- Gardens and roof terraces.
- Hotel and business parks.
- Public spaces such as roadside verges and roundabouts.

Edel Grass supplies artificial turf products via its partners in business: wholesale companies, professional installation companies and the DIY channel.

The benefits of our artificial turf:

- Natural and representative appearance.
- Uniform quality throughout the year.
- Comfort.
- Sustainability.
- Ease of maintenance (requires no mowing, sprinkling or manuring).
- UV-stability.

Quality

Artificial turf has to meet increasingly stringent quality requirements. To start with, it must remain in perfect condition all year round: year in, year out. Innovation and quality are therefore vital for the artificial turf market. This applies not only to us as a manufacturer but also to the partners we work with. Edel Grass therefore chooses reliable partners who, in cooperation with us, are capable of producing hard-wearing artificial turf applications to a high quality standard.

Guarantee

Edel Grass issues an eight-year guarantee on its products. This guarantee covers UV-stability and technical faults.

Sustainability

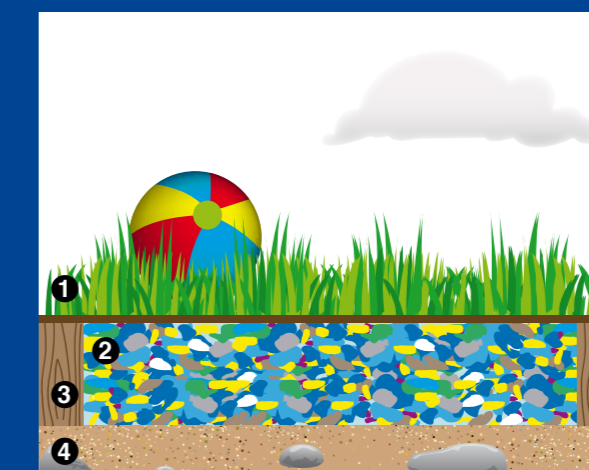

Sustainability is a key priority for Edel Grass. Our aim is to produce sustainable systems. We have already completed a number of developments in this area in recent years. Our ultimate goal is to produce systems in which all the components can be reused or disposed of in an eco-friendly way. Together with our partners, we will continue to work on meeting these goals!

Playgrass® by Edel Grass

Edel Grass and KSP are introducing a unique playground concept on to the market. Playgrass® by Edel Grass is a certified artificial turf construction which meets all the current requirements governing playing surfaces (NEN-EN 1177). The combination of a colourful artificial turf (Edel Playgrass®) and a fall-cushioning substrate (KSP) gives each play area a highly attractive appearance.

The law prescribes that all playgrounds must have a fall-cushioning surface beneath structures of 1.50 metres or more. Playgrass® by Edel Grass provides a safe fall-cushioning value for structures of up to 3 metres high. Following the installation of many successful systems in the Netherlands, the Edel Grass concept is now also available internationally.

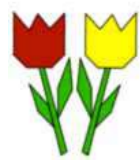

Construction of Playgrass® by Edel Grass

1. Edel Playgrass® artificial turf
2. Fall-cushioning (thickness depends on fall height)
3. Surface construction
4. Average sand base of 0.35 metres

Technical specifications

Construction:	Fall height to:
Playgrass® 35	1.6 metres
Playgrass® 50	2.4 metres
Playgrass® 70	3.0 metres

Colourful & safe

The many colours that Playgrass® by Edel Grass can be supplied in will transform your playground from a purely functional place to a colourful focal area in the neighbourhood. The colours will allow you to introduce different patterns and play variants into the field, thereby widening the options available and making play more enjoyable.

Playgrass® shapes and figures

To make the playground even more attractive, we have designed a selection of shapes and figures which we can supply. These shapes are cut into the turf on-site. The adjacent page gives a list of the shapes and figures we can supply on request.

The benefits of Playgrass® by Edel Grass in a nutshell:

- Sustainable.
- Hard-wearing.
- Safe.
- Low maintenance.
- Available in any size.
- Available in a wide range of 'fun' shapes.
- Artificial turf (Edel Playgrass®) can be supplied in various colours.

Maintenance & quality

Quality and development

Playgrass® by Edel Grass is the result of close cooperation between Edel Grass and KSP. Thanks to our many years of experience in the market for artificial turf, we can devise a customised system for every application. Edel Grass artificial turf is made with yarns and backing manufactured by TenCate. KSP is responsible for the certified fall-cushioning of the system. The combination of the fall-cushioning and the artificial turf results in this unique product.

Edel Grass has an international network of carefully selected partners who are responsible for the laying and maintenance of Playgrass® by Edel Grass. We can thus control the quality of the system supplied by us from start to finish.

Extend the life of your playground!

To guarantee the enjoyment and safety of children for a more extended period, proper maintenance is vital. Careful maintenance will ensure that the playground retains its fall-cushioning qualities and attractive appearance. Maintenance also helps to maximise the life of the system. We can advise you on how to maintain your playgrounds in order to keep them looking good and working well for as long as possible.
