

## Edel Tennis SuperSoft

Edel Elite SuperSoft is the artificial tennis court for sports clubs and associations which want to offer their players the best possible playing comfort. Edel Elite SuperSoft's micro-curved polyethylene fibres provide an exceptionally consistent playing surface. The SuperSoft tennis court is semi-sand filled, as a result of which the micro-curved fibres fully cover the sand and play takes place entirely on top of the fibres. This enables the players to turn and pivot easily, making Edel Tennis SuperSoft a tennis system with optimum playing properties.

**The best alternative to nature**

## Product characteristics

# EDEL TENNIS SUPERSOFT

Edel Tennis SuperSoft stands for:

- Playability in almost all weather conditions
- Micro-curved, polyethylene TenCate LSR® (Low Sliding Resistance) fibres (10-12 mm)
- A semi-sand filled top layer, which aids stability and consistent ball roll/bounce
- Integrated line markings for predictable ball roll/bounce
- Play and run off areas available in a contrasting colour
- Sprinkler system not required
- Easy to maintain due to semi-sand filled top layer
- Suitable for both indoor and outdoor use

### Construction

Edel Tennis SuperSoft can be used with a variety of substrates, and remains ITF certified under these conditions (Court Pace Rating 3). As a result, the system can be customised for any location.

Material	: Polyethylene
Fibre type	: Fibrillated/micro-curved
Colours	: Summer green, olive green and clay red
Line markings	: Various colours available
Run off areas	: Various colours available

TenCate and LSR are registered and/or claimed trade marks of Koninklijke Ten Cate nv and/or its operating companies.

*The wear and tear-resistant  
tennis court with perfect  
playing properties.*
