

Edel Soccer ViaGrass Pro

The Edel Grass ViaGrass Pro proves that resilience and optimum playing properties can go hand-in-hand.

This system is a further refinement of the traditional monofilament fibre. Fibres with a reinforced core ensure that the artificial grass retains both its shape and position throughout its lifespan. The result is an impressively durable system with perfect playing properties!

The best alternative to nature

Product characteristics of EDEL SOCCER VIAGRASS PRO

Edel Soccer Viagrass Pro stands for:

- Perfect playing properties, even after intensive use
- Improved resilience. Due to extra reinforcement, the TenCate fibre returns to the upright following load-stress
- The fibre keeps its 'look and feel' throughout the product's lifespan
- UV stability
- Bi-colour
- The right choice for professional and recreational sports

Construction

The Edel Soccer ViaGrass Pro system has been vetted for use with various substrates and infill materials. This enables a customised system to be supplied for every conceivable location.

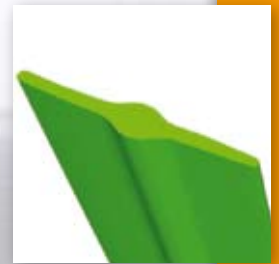

Base material	: Polyethylene
Type of yarn	: Monofilament

FIFA Preferred Producer for Football Turf

With the 'FIFA Preferred Producer' initiative, FIFA hopes to enforce consistent quality standards for artificial football pitches around the world. Edel Grass also pursues this end and shares in the responsibility for quality assurance.

As a Preferred Producer, Edel Grass is expected to demonstrate its expertise in civil engineering, project management and maintenance.

AND THEREBY TO PROTECT THE INTERESTS OF THE USERS AND CONSUMERS
 (Confederations, National Associations, Clubs, Players, Private owners, communities and FIFA)
